

Is it time to replace your University Sleep Mattress?

Here are your Fast Five check points:

1. CHECK THE LAW TAGS.

Is your mattress more than 8 years old? Pull from inventory.

2. COVER CHECK.

If the cover of your mattress shows signs of wear, such as being worn or torn – or if the seams are ripped, the health and safety properties of your mattress cover could be compromised. Fluids, allergens, bed bugs, etc. now have a means to penetrate the cover; even the fireproof feature of the mattress could be at risk. Replacement is highly recommended.

3. SLEEP SURFACE SILHOUETTE?

Over time and use, the foam and springs in your mattress can compress and lose their effectiveness. If your mattress is sagging or uneven, time to pull it.

4. ODOR CHECK.

Unpleasant, but true, if your mattress has an odor, it is time to pull it.

5. FINALLY, HOW DOES IT LOOK? ANY STAINS?

If you wouldn't want to sleep on it, neither will anyone else!
